Dataset Summary

This section provides an overview of the uploaded dataset including data quality, structure, and completeness.

Property	Value
Categorical Columns	0
Total Columns	2
Duplicate Rows	0
Missing Values	0
Numeric Columns	2
Total Rows	100

Dataset Quality Assessment

Observations

- The uploaded dataset contains **100** records.
- Missing values detected : **0**
- Duplicate rows detected : **0**
- The dataset appears suitable for further analysis and machine learning.

Machine Learning Summary

The following table summarizes the trained machine learning model and its evaluation metrics.

Metric	Value
actual	[91314.45, 38217.59, 68826.74, 111437.28, 109915.43, 102948.12]
mae	715.697
metadata_path	trained_models/Linear Regression_metadata.joblib
model_path	trained_models/Linear Regression.joblib
predictions	[92331.55113133311, 38118.89136538157, 69444.70699216202, 111437.28, 109915.43, 102948.12]
problem	Regression
r2	0.999
rmse	824.663
test_samples	20

train_samples	80
---------------	----

4. Model Performance

The chart below compares the actual values with the predicted values produced by the trained machine learning model. A smaller gap between the points indicates higher prediction accuracy.

Model Interpretation

- Problem Type : **Regression**
- R² Score : **0.999**
- Mean Absolute Error : **715.697**
- Root Mean Squared Error : **824.663**

The regression model demonstrates the relationship between independent variables and the target variable. Higher R² and lower error values indicate better prediction quality.

5. Future Prediction

No prediction has been generated for this report.

Business Recommendations

- Continue collecting more historical records for improving model performance.
- Regularly retrain the model whenever new datasets become available.
- Monitor prediction accuracy over time to detect model drift.
- Integrate the trained model into real-time dashboards for decision support.
- Use AI Storytelling together with data visualization to communicate insights effectively.

Future Scope

Future enhancements planned for DataInsight AI include:

- Automatic dashboard generation.
- Interactive AI chatbot with memory.
- Time-series forecasting.
- Deep Learning model integration.
- Business KPI monitoring.
- Cloud deployment with collaborative reporting.

Thank You

This report has been automatically generated by **DataInsight AI**, an AI-powered data storytelling platform designed to transform raw datasets into meaningful business insights. The results presented in this report are based on the uploaded data and the selected machine learning model.
